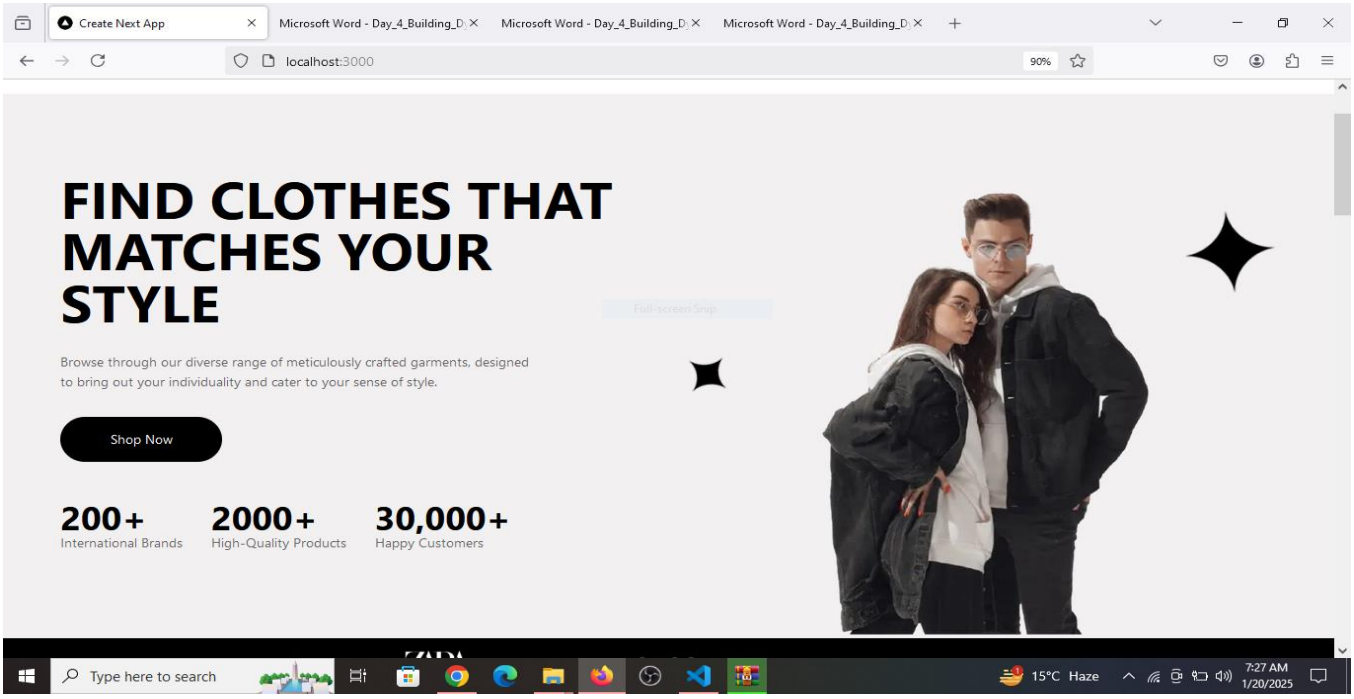
Hackathon Day 4 Task Update

All dynamic pages for the frontend have been successfully created and tested. The following pages are now fully functional and displayed on the frontend:

- **Home Page**
- **About Page**
- **Contact Page** (with a submit form)
- **Review Page** (for client feedback)
- **Checkout Page**
- **Wishlist Page**
- **Products Listing Page**

The entire project is showcased on the frontend, ensuring a smooth and dynamic user interface. ✅

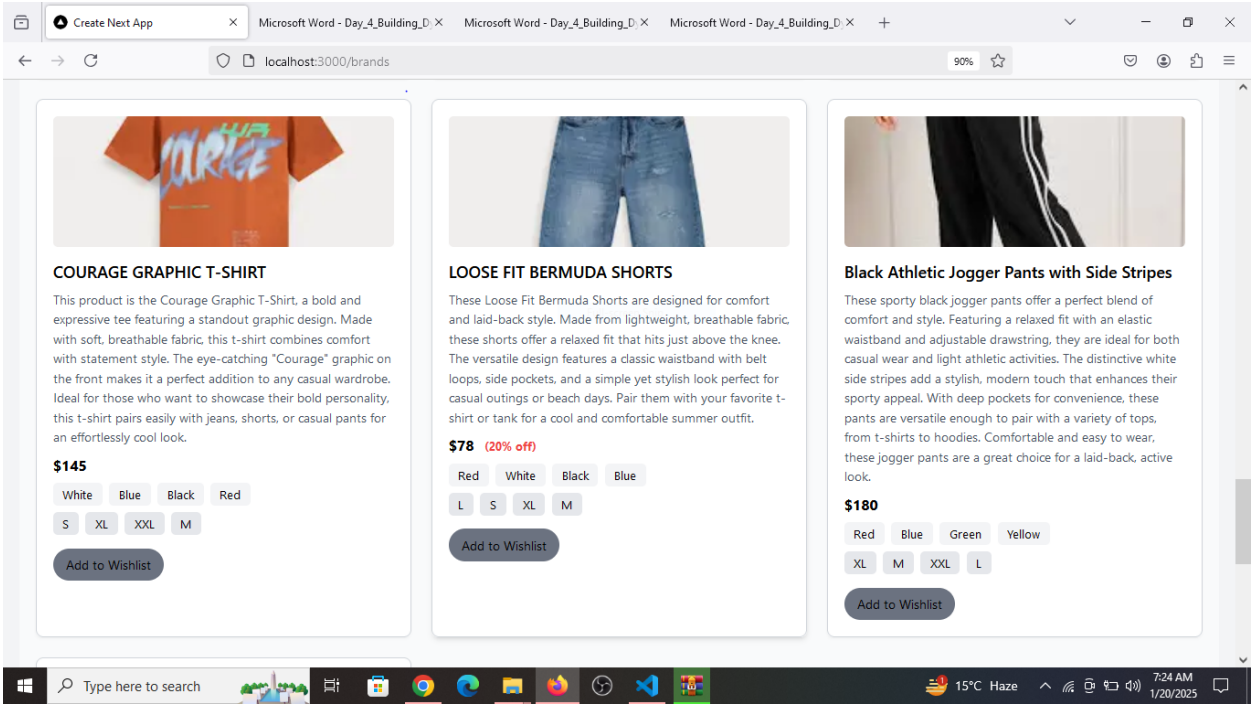


Product Listing Page

The **Products Listing Page** is fully dynamic and displays all products with essential details, including:

- Product Name
- Image
- Price
- Description

Users can easily browse through the products, view images, and select items for checkout or wishlist. The design is responsive and user-friendly. ✅

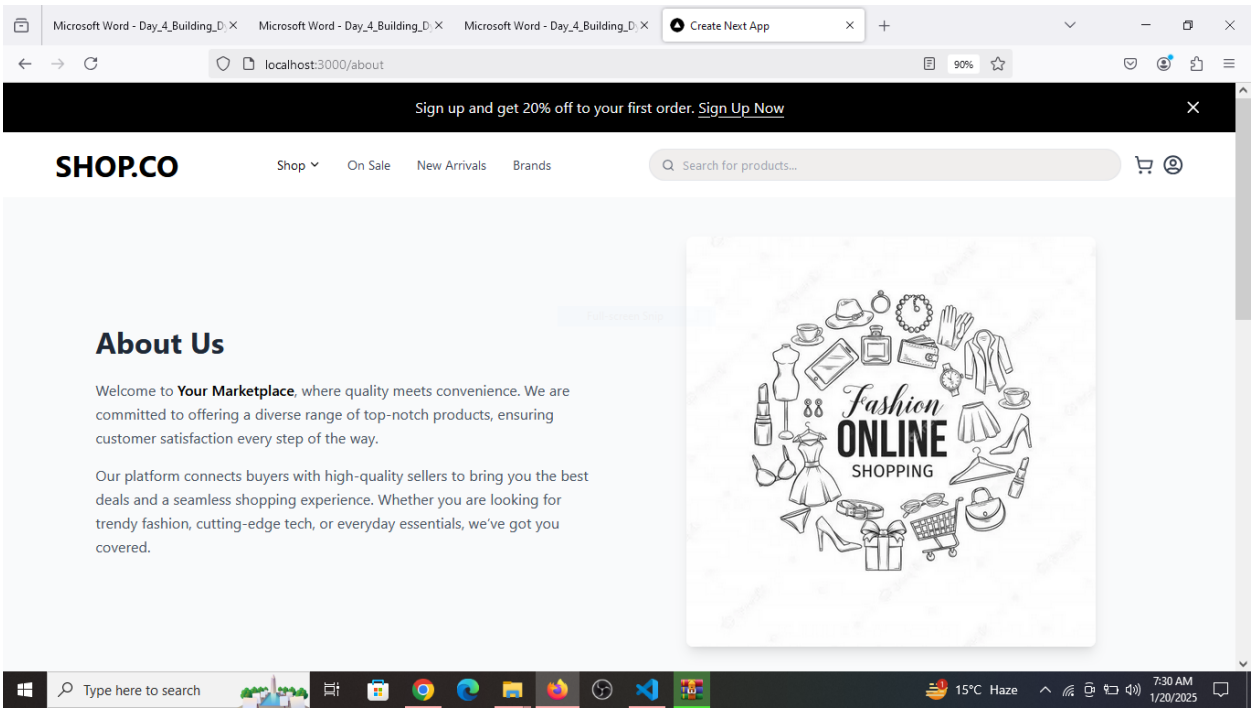


About Page

The **About Page** provides detailed information about the website or business. Key highlights include:

- A dynamic layout with text content fetched dynamically.
- Engaging visuals or images representing the brand.
- Clear and concise description of the business purpose, mission, and values.

This page is fully responsive and enhances user engagement by offering insights into the brand. ✅

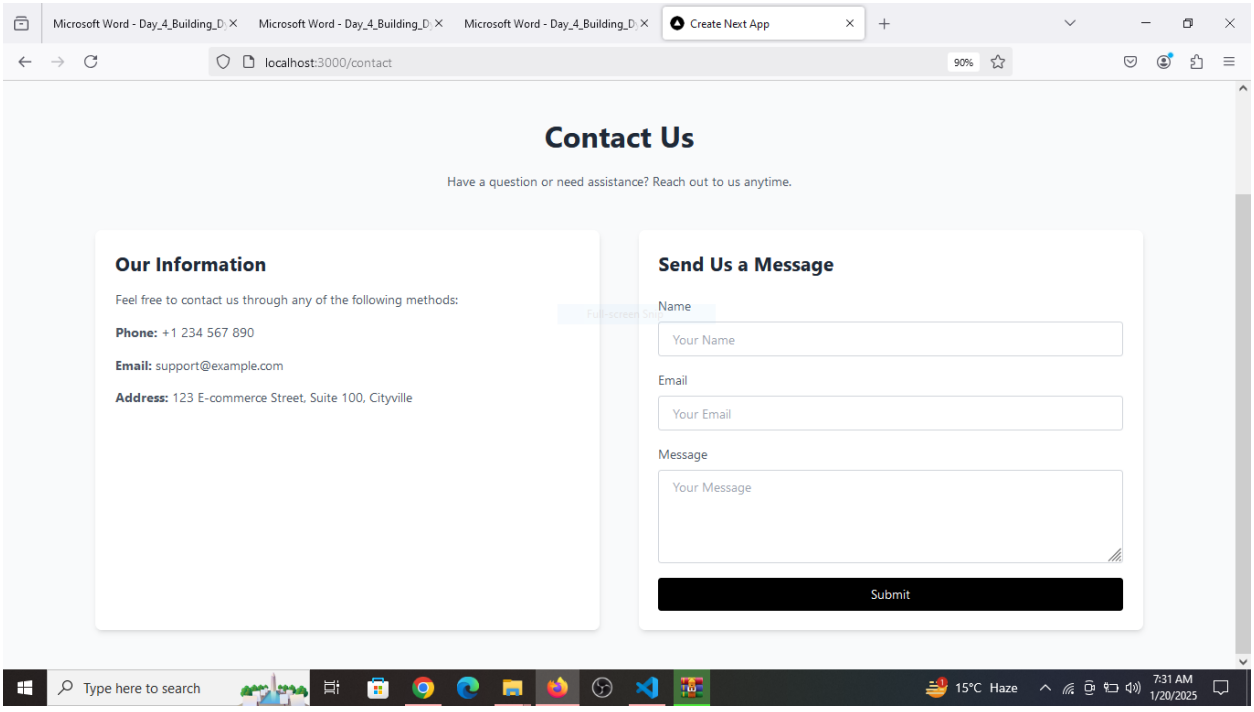


Contact Page

The **Contact Page** includes:

- A dynamic contact form for users to submit queries.
- Input fields for name, email, and message, with validation.
- Responsive design ensuring accessibility across all devices.

This page allows seamless communication between users and the business. ✅

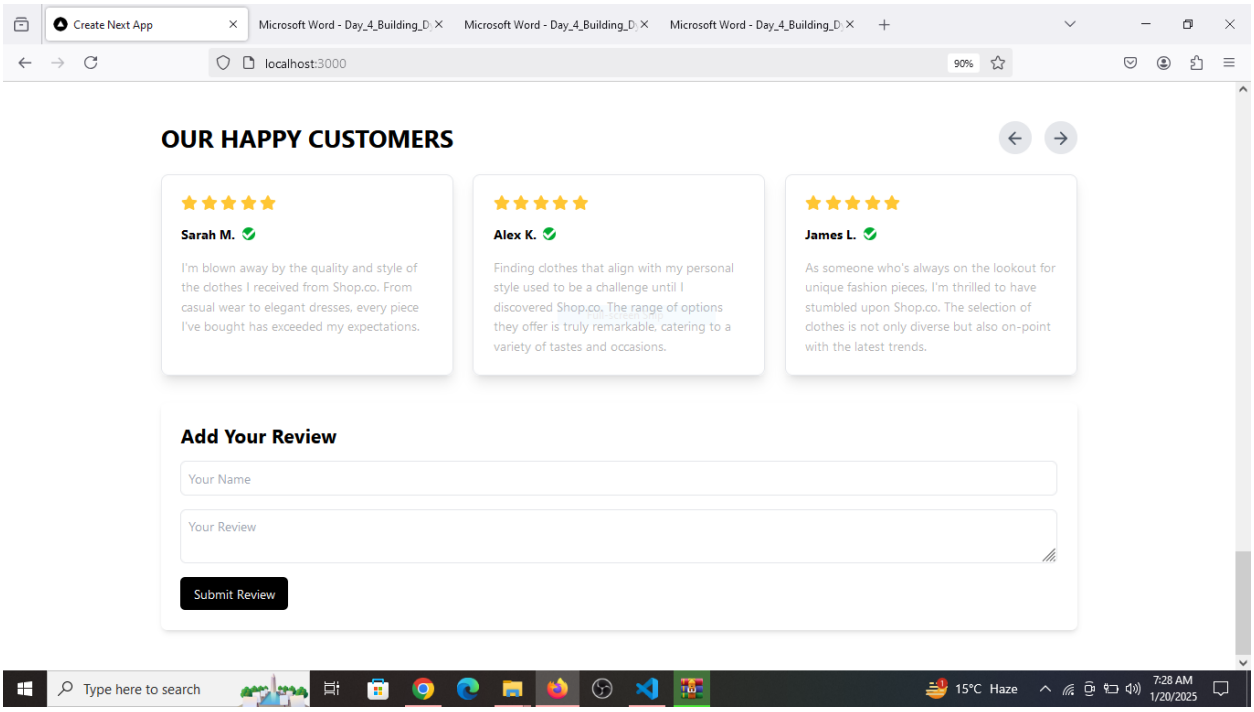


Review Page (Client Feedback):

The **Review Page** allows clients to provide feedback on the products they've purchased.

- **Features**:
    - Product details with an option to rate (stars, thumbs up).
    - A text box for comments.
    - Display of previous customer reviews.

It builds trust and offers valuable insights into product quality. ✅

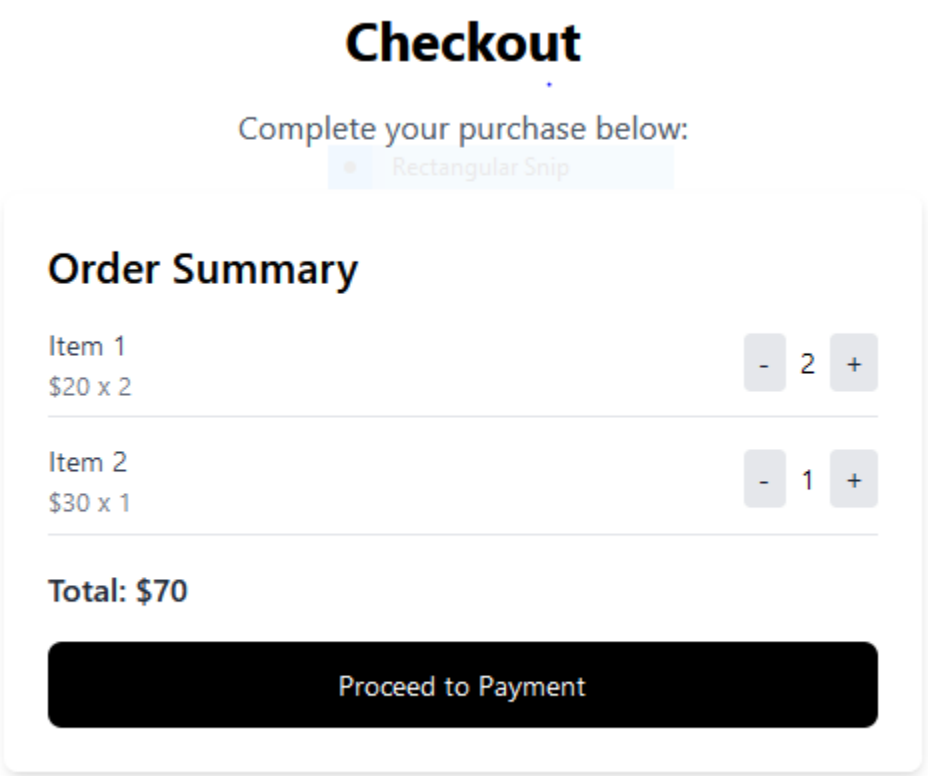


Checkout Page:

The **Checkout Page** allows customers to finalize their purchases.

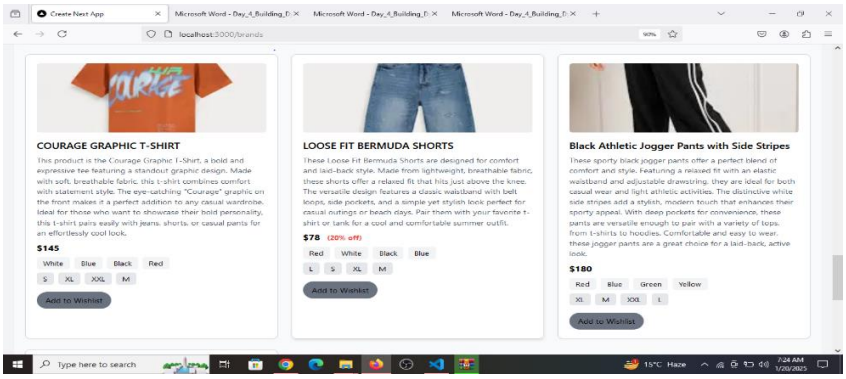
- **Features**:
    - Summary of items being purchased.
    - Input fields for **shipping** and **billing address**.
    - Various **payment options** (credit/debit cards, PayPal, etc.).
    - Order review before final confirmation.

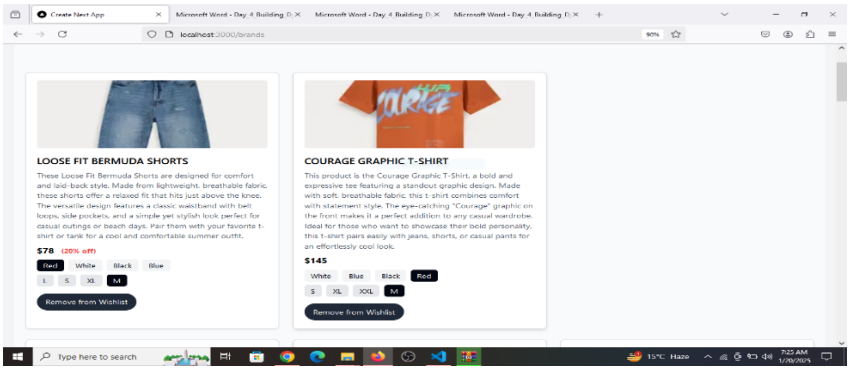
A streamlined checkout process boosts customer satisfaction and encourages conversions.



Wishlist Page:

The **Wishlist Page** allows users to save products for future purchase.

- **Features**:
    - List of items saved for later, including **product name**, **image**, and **price**.
    - Options to **move items to the cart** or **remove** them.
    - A **total value** of all items in the wishlist.




This page helps users keep track of items they're interested in, making it easier to return and purchase later.
